

Quests

Build a man workshop!

Even in the multiverse it is fun to build things (and maybe even burn them!). The splitting of the timelines has destroyed the man in the current universe you are in and your help is needed to build a new one as the burners in this universe are all preoccupied staring at the black hole that is left!

Build this universe a new man however you want! Use things you have lying around the house, get creative or go pro and visit the official 2020 build your own man website <https://kindling.burningman.org/events/build-n-burn-your-own-man/>

Take a picture of your final man and upload the evidence!
